

Based on the "Medieval Einkorn Bread Recipe Plan" and applying your request for **unenriched flours** and **King Arthur** specifics (similar to the H-E-B protocol), here is the optimized Wegmans plan.

This plan upgrades the "Base Flour" from the standard red bag (which is enriched) to King Arthur or Wegmans Organic to meet your "clean label" requirement.

Phase 1: Wegmans Purchase Plan (The Unenriched Protocol)

This list replaces standard enriched staples with high-performance, unenriched options available at Wegmans.

- **Primary Structure Flour (The Base): King Arthur Unbleached Bread Flour (Blue Bag) OR Wegmans Organic Unbleached All-Purpose Flour.**
 - *Why:* The standard Wegmans "Red Bag" AP flour is enriched. Switching to King Arthur Bread Flour (12.7% protein) provides the necessary gluten strength to lift the heavy Einkorn and meets your unenriched requirement.
- **Flavor Flour (The Medieval Element): Jovial Organic Einkorn All-Purpose Flour.**
 - *Why:* Wegmans stocks this specific ancient grain, which provides the historical flavor profile.
- **Texture Flour (The King Arthur Standard): King Arthur 100% Whole Wheat Flour.**
 - *Why:* Milled from Hard Red Spring Wheat, this adds the rustic "Maslin" texture and high absorption.
 - *Option B (The Lighter Loaf): King Arthur White Whole Wheat Flour.* Use this for a milder, sweeter flavor ("Golden" style) that is lighter in color but still 100% whole grain.
- **Leavening: Red Star Active Dry Yeast (Jar) or Wegmans Instant Dry Yeast (Jar).**
 - *Note:* Wegmans typically does not sell the 1lb professional bricks found at H-E-B. Buying the jar is more economical than the 3-strip packets.
- **The Honey: Nature Nate's Raw & Unfiltered Honey.**
 - *Why:* Widely available at Wegmans, this matches the "commercial raw" standard for better flavor than standard clover bears.
- **Salt: Wegmans Fine Sea Salt.**

Phase 2: Large Batch Dough Creation (4 Loaves)

Total Time Estimate: 45 mins active, 18-24 hours waiting (passive).

Hydration Note: Because we are upgrading to King Arthur Whole Wheat (Spring Wheat) and Bread Flour, the dough will be "thirstier" than the original recipe. We have increased the water slightly to 1550g to compensate.

1. **The Mix (Evening before):** In a large bucket or stockpot, dissolve **40g Honey** in **1550g Cool Water**.
2. **The Yeast:** Sprinkle **5g Yeast** (approx. 1.5 tsp) on top.
3. **The Flour Dump:**
 - **1200g King Arthur Bread Flour** (or Wegmans Organic).

- **600g Jovial Einkorn Flour.**
 - **200g King Arthur Whole Wheat** (Red or White/Golden).
 - **50g Salt.**
4. **No-Knead Stir:** Mix with a wet hand or sturdy wooden spoon until a shaggy, sticky mass forms. Ensure there are no dry pockets at the bottom.
 5. **The Rest:** Cover and let sit for 30 minutes (Autolyse).
 6. **The Fold:** With a wet hand, reach into the bucket, grab the dough from the side, and fold it over the center. Rotate and repeat 4–8 times.
 7. **The Long Sleep:** Cover tightly and place in the refrigerator for **18 to 24 hours**.
-

Phase 3: Shaping & Preservation (The Par-Bake)

Time Estimate: 30 mins active, 2.5 hours proofing, 35 mins baking.

1. **Divide:** Grease 4 loaf pans. Turn the cold dough out onto a floured surface. Divide into 4 equal pieces (approx. 900g each).
2. **Shape:** Flatten gently into a rectangle, roll up like a sleeping bag, and place seam-side down in the pans.
3. **Rise:** Cover loosely with oiled plastic wrap. Let rise at room temperature for **2–3 hours** (dough should crest 1 inch above the rim).

Step A: For the Loaf You Want to Eat IMMEDIATELY

1. Preheat oven to **400°F - 425°F**.
2. Bake for **40–45 minutes**.
3. **Doneness:** The loaf is done when the internal temperature reaches **200°F–210°F** and the crust is dark golden brown.

Step B: For the "Meal Prep" Loaves (Freezing)

1. Preheat oven to **375°F** (190°C).
 2. Bake for **30–35 minutes**.
 3. **The Critical Check:** Remove loaves when the internal temperature reaches **180°F** (82°C). The crust should be pale/blonde but set.
 4. **Cool & Freeze:** Remove from pans immediately. Cool completely on a rack (2–3 hours). Wrap in plastic + foil. Freeze.
-

Phase 4: Baking the Frozen "Meal Prep" Loaves

Option 1: Thaw First (Best Texture)

- **Time:** Thaw overnight + 15 mins bake.
- **Steps:** Thaw the loaf. Preheat oven to **425°F**. Unwrap and bake directly on the rack for **10–15 minutes** until the crust is crisp and brown.

Option 2: From Frozen (Fastest)

- **Time:** ~35 mins.

- **Steps:** Preheat to **350°F**. Bake unwrapped frozen loaf for **25–30 minutes**. Increase heat to **425°F** for the last 5 minutes to crisp the crust.
-

Phase 5: Small Batch Recipe (Single Loaf)

Use this for a single fresh loaf using the Wegmans unenriched/King Arthur blend.

Ingredients:

- **Water (Cool):** 390g (Increased for high-protein flour absorption)
- **Honey:** 10g
- **Yeast:** 2g (approx. 1/2 tsp)
- **King Arthur Bread Flour:** 300g
- **Jovial Einkorn Flour:** 150g
- **King Arthur WW:** 50g
- **Salt:** 12.5g

Instructions:

1. **Mix:** Dissolve honey and yeast in water. Add flours and salt. Mix with a wet hand until shaggy.
2. **Rest & Fold:** Rest 30 mins. Fold 4 times with a wet hand.
3. **Ferment:** Refrigerate 18–24 hours.
4. **Shape:** Place in a greased loaf pan.
5. **Rise:** Proof for 2–3 hours at room temp.
6. **Bake:** Bake at **425°F** for 40–45 minutes until internal temp reaches 200°F.
